FR 25 RGO – retro-reflective light barrier for the recognition of transparent objects

 Made in Germany

FR 25-RGO

Retro-reflective light barrier for the recognition of transparent objects

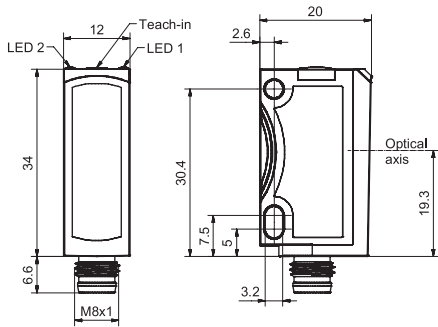

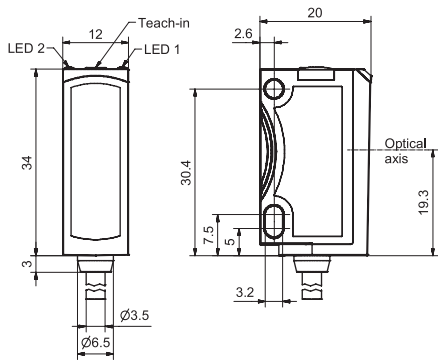

PRODUCT HIGHLIGHTS

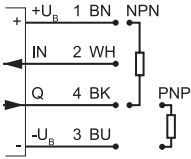

- Reliable recognition of transparent objects regardless of their shape
- Autocollimation principle: Reliable and precise recognition starting from a range of just 0 mm
- DELTA-function (Dynamic Evaluation of Light for Threshold Adaption): Dynamic adaption of the sensor to alternating environmental conditions – not influenced by dust or dirt
- Precise and highly visible light spot with a sharp contour for an easy alignment of the sensor

We look ahead.

Yesterday, today and in the future.

Since SensoPart was founded in 1994, we have constantly focussed on the future. Our motto has always been: We gauge ourselves not by what is possible today, but by our ideas for what can be achieved in the future. Many ground-breaking ideas from that time have since become successful products, which are now indispensable in modern automation technology – endorsed by the numerous prizes for innovation which we have received over recent years. Today, SensoPart is the technological leader in many areas of industrial sensor technology. And we still have many ideas for the future.
