

Maximum precision

FR 25-RLO & FR 55-RLO – Autocollimation laser retroreflective photoelectric sensor

FR 25-RLO & FR 55-RLO

Autocollimation laser retroreflective photoelectric sensor

 made in Germany

FR 25 with bracket MBD F 25ST.

FR 25 with bracket MBD-S94.

Simple mounting, precise adjustment:
The robust mounting accessories together with the dovetail guide which is integrated in the housing permit fine retro-adjustment of the laser sensors.

TYPICAL RLO

- Safe operation due to laser class 1 
- Reliable small-part detection from a size of 0.2 mm
- High switching frequency of 10 kHz with miniature housing
- High positioning accuracy thanks to minimum response time and constant detection position with lateral object approach
- Reliable object detection from a range of 0 mm thanks to autocollimation
- Dynamic, static or external teach-in

Precise object detection via autocollimation principle

With retroreflective photoelectric sensors one speaks of the autocollimation principle when the light reflected from the reflector travels parallel to itself (i.e. within itself). The light emitted by the sensor hits a reflector and is reflected. The reflected light is then deflected to a receiver by a semi-transparent mirror and evaluated.

The FR 25-RLO and FR 55-RLO autocollimation laser retroreflective photoelectric sensors have a small homogeneous light spot over the entire detection range. As transmitter beam and receiver beam are on a single axis, it is possible to detect even the smallest of parts through small drilled holes and from a range of 0 mm. Adjustment takes place using teach-in – either via button or via external control line. In combination with the function „dynamic teach-in“, setting via control line is also possible when the sensor is placed in an inaccessible location.

The FR 25-RLO miniature retroreflective photoelectric sensor is particularly characterised by its excellent performance. The FR 25-RLO can detect small parts from an object size of 0.2 mm over the entire detection range. With its high switching frequency of 10 kHz and a minimum response time of 50 µs, the sensor masters even the fastest automation processes. It guarantees maximum precision in positioning tasks thanks to the constant detection position of objects with lateral approach over the entire operating range. With these features, the FR 25-RLO is unique in the market for sensors of this size when it comes to speed and precision.

Typical applications

Detection of pins within a range of tenths of a millimetre.

Detection of IC-Pins.

Detection of small parts behind drilled holes.

Further applications:

- Precise front-edge detection
- Small part detection

FR 25-RLO

Autocollimation laser retroreflective photoelectric sensor

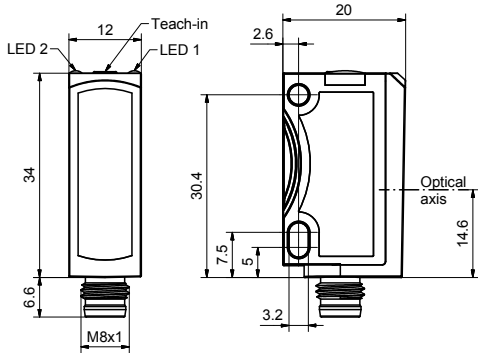

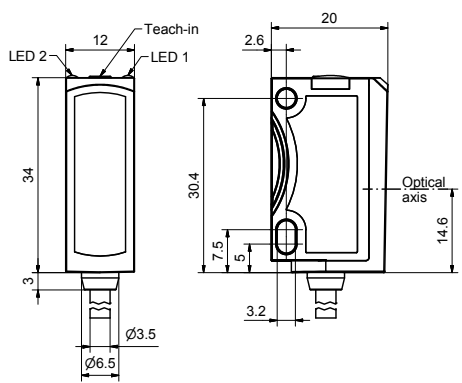

PRODUCT HIGHLIGHTS

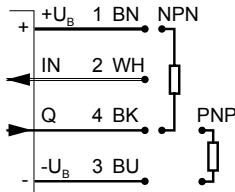

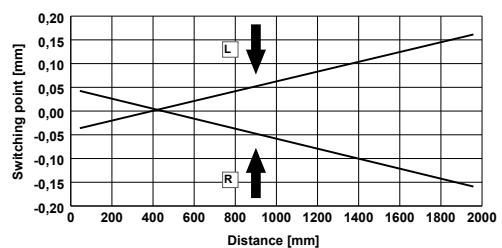

- Reliable small-part detection over the entire operating range from a size of 0.2 mm
- Precise front-edge detection even in fastest automation processes thanks to a high switching frequency of 10 kHz
- Constant detection position with lateral object approach over the entire operating range for maximum switching point and positioning accuracy

FR 55-RLO

Autocollimation laser retroreflective photoelectric sensor

PRODUCT HIGHLIGHTS

- Reliable small-part detection from a size of 0.2 mm at a scanning distance of 0–5 m
- Precise front-edge detection even in fastest automation processes thanks to a high switching frequency of 5 kHz
- Reliable detection of objects through the smallest of openings thanks to autocollimation; therefore sensor can be placed outside any danger zone
- No blind zone - detection from a range of 0 mm

We look ahead.

Yesterday, today and in the future.

“We gauge ourselves not by what is possible today, but by our vision of what can be achieved” – this has been our motto since the foundation of SensoPart in 1994. Our goal is to always be a step ahead and to be able to offer our customers the most innovative sensor for industrial automation.

With our easy to integrate VISOR® Vision sensors and our compact laser sensors with an amazing background suppression made in Germany, we stick up to this motto.

Get ready – we still have a lot of ideas for the future.
