features

Compact cubic 50 x 50 mm universal photoelectric sensor, excellent performances and high versatility due to the wide choice of different versions available.

Cable output or revolving connector, NPN/PNP outputs for Vdc models or SPDT relay output for multi-voltage Vdc/Vac models.

Complementary outputs NO + NC available on the Vdc models or selectable output NO/NC available on the multi-voltage Vdc/Vac models.

Totally protected against electrical damages.

Wide choice of optical functions available: Diffuse: 2m

Background suppression: 500mm

Polarized: 6m

Through beam: 20m.

Dual multifunction output state LEDs

Q50 Cubic Photoelectric Sensor

Q50 Cubic Photoelectric Sensor Series, size 50 x 50 mm, offers a wide range of models:

- direct diffuse with working distance up to 2 m;
- background suppression up to 500 mm;
- polarized retro-reflective up to 6 m;
- through-beam with sensing range up to 20 m.

Available different versions: Vdc models with NPN/PNP and NO+NC selectable outputs. Multi-voltage Vdc/Vac models with relay output and NO/NC contacts available.

Compact housing provided with an M12 rotating connector or pre-wired cable allows to the user's an easy and fast installation, also in application with reduced space.

Highly visible LEDs simplify the alignment phase between sensor and target, besides the sturdiness of the housing guarantees a safe and reliable functioning of the product also in harsh environments. The mechanical protection is IP67 and the sensor is UL certified.
